

Extend business processes securely to mobile workforces .

A secure solution to complete business forms on mobile devices and conveniently print on-demand to a network printer.

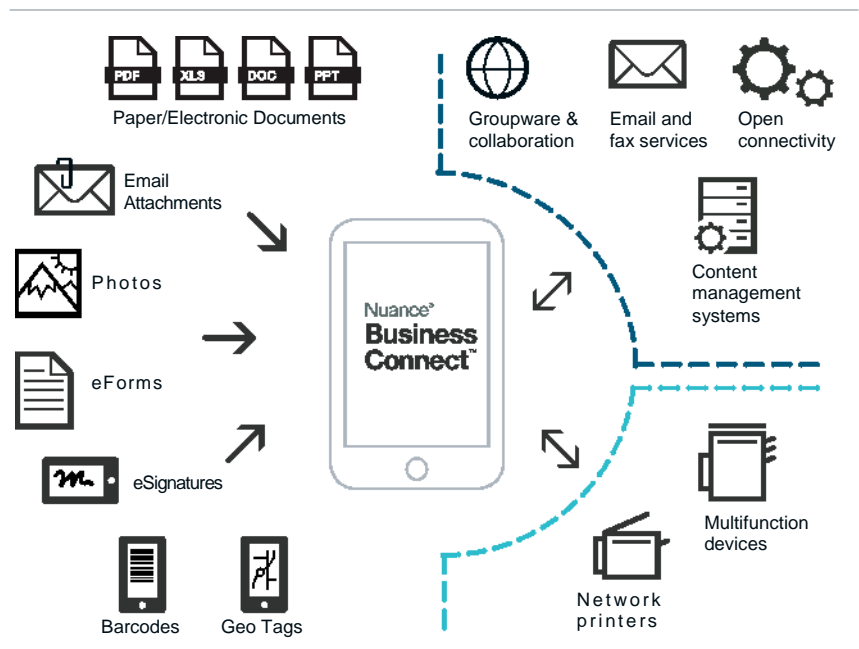

Nuance® Business Connect™ is a productivity app for businesses and organizations in need of extending business processes to their mobile workforces. With Nuance Business Connect, remote workers can send documents, photographs, and other electronic files to their accounting, healthcare, ERP or any number of other business applications securely. What's more, Nuance Business Connect provides mobile workforces with the flexibility to complete business forms on their devices, virtually eliminating the need for paper-based forms used today. And for teams working in the office, Nuance Business Connect offers a secure and convenient means to print sensitive documents "on-demand" to a network printer.

Many applications offer a capture solution or a print solution or another isolated part of the process. However, with Nuance Business Connect you get a total solution, one with a unique combination of features that also extends the power of Nuance AutoStore® and Nuance Output Manager™ to smart devices. Nuance Business Connect allows mobile workers to work efficiently and deliver quality information downstream.

Nuance Business Connect major capabilities

Mobile capture on the go.

With Nuance Business Connect, you can deliver information back into your business processes securely,

whatever the format: a picture taken on your mobile device, an email attachment, a file downloaded from a cloud-hosted service, or from any application on your mobile device. Nuance Business Connect allows PDF, Microsoft Word, PowerPoint and Excel document captures.

Electronic forms.

Forget about having to find, print, carry, and return paper forms. With Nuance Business Connect, now you can extend back office business applications directly to your mobile device. New patient admittance, claims processing, or any other forms-based application is delivered securely to your remote workforce. Data can be validated easily with document management or other

line of business applications directly within the form itself. As a result, processes are completed faster and more accurately.

Barcode scanning with lookup.

Barcodes help businesses to speed up work and to improve data accuracy. With Nuance Business Connect, enjoy these same benefits when on the go. By simply reading a barcode with your mobile device, populate eForm fields instantaneously with accurate data pulled right from the company's database. Nuance Business Connect supports many widely used barcode types, allowing mobile workers to complete electronic forms efficiently for almost any application.

eSignature: acknowledge consent, anywhere, anytime. Keep business on track with signatures captured electronically and sent from smart devices. Nuance Business Connect allows workers to obtain the consent they need quickly to perform tasks, validate information, and obtain approval. Nuance Business Connect allows for easy signing directly on the mobile device screen. Workers, managers, and executives can collect and deliver the required approvals any time, any place, enabling work to move forward while they are on the go.

Geo-tagging information. Deliver a deeper understanding of the situation when you include geo-location information with your mobile documents and photographs. Use map coordinates to validate where the work was performed. Audit mobile workforces by reviewing location history. Look up an address by simply pointing to it on the map.

Secure file access. No need for unsecured device-side storage, third-party services, or cloud storage to support the exchange of information with your mobile workforce. Now mobile workers can tap into the company network from wherever they are. Nuance Business Connect's "MyFiles" connects workers to their networked Home Directory, affording them secure access to their

files and shared network folders. By leveraging Nuance AutoStore, mobile workers can exchange information securely with the enterprise's content management systems.

Secure mobile print: safely print, wherever, whatever, whenever.

Initiate print jobs from your smart phone or tablet, wherever you are. Your information waits safely in the print queue until you release it securely at a network printer or MFD by reading the printer's barcode with your mobile device. Nuance Business Connect keeps information secure until it is needed, and eliminates the sprint to the device to pick up confidential information. With Nuance Business Connect, office workers, mobile teams, and employees on the go can use their mobile devices to print securely to any network printer.

Microsoft SharePoint®.

Thousands of companies use Microsoft SharePoint for collaboration and information storage. Now, with Nuance Business Connect, access through Microsoft SharePoint® is extended to smart devices. Whether in the office or on the go, access the files you need and deliver information to your colleagues. Browsing, viewing, attaching, and printing Microsoft SharePoint documents is easy from your mobile device.

Bi-directional database connectivity.

Now, looking up information on a customer, patient, or product and displaying it on your tablet is easier than ever with Nuance Business Connect. Using simple lookup fields, users can return values stored in backend databases and use it for indexing data in real-time. This minimizes the time spent entering data, and the chances of it being entered incorrectly.

Runs on iOS and Android.

Nuance Business Connect is an app that runs on iOS and Android operating systems. It extends the powerful capabilities built into these devices with intuitive mobile data-capture and print applications that are built upon Nuance AutoStore and Nuance Output Manager platforms.

NOTE: The free Nuance Business Connect app requires Nuance AutoStore® or Nuance Output Manager™ platform for all operations. Please consult with your company's IT organization before downloading and running this app. Nuance Business Connect will not operate without the necessary back-end system(s). To try the Nuance Business Connect app, you can download it now and connect to our demonstration system. Please visit <http://www.nuance.com/imaging/mobiledemo/registration.asp> for further instructions.
